

Application area

- Shipping
- Machinery construction
- Chemical and petrochemical industry
- General process technology

Technical data

Constructional design / case

Design:	High quality case with bajonet ring, material: stainless steel mat.-no. 1.4301 (304)
Nominal size:	NS 100 or NS 160
Degree of protection per EN 60529:	IP 66
Case filling:	Labofin Further filling liquids upon request.
Case seal:	Material gasket: NBR

Features

- High quality case with bajonet ring NS 100/160, degree of protection IP 66
- Nominal ranges -40 °C...700 °C, further nominal ranges from -200 °C...700 °C upon request
- Case and wetted parts of stainless steel
- Different connections can be supplied
- Temperature detecting element 6, 8 and ≥ 10 mm diameter
- Short immersion lengths of the temperature detecting element may be used
- Accuracy class 1 as per EN 13190
- Micro adjusting pointer for indication correction
- EAC declaration (upon request)

Options

- Approvals/Certificates
 - Explosion protection (ATEX) for mechanical devices
 - Certificate of measuring equipment for Russian Federation
 - Calibration certificate as per EN 10204
- Case with liquid filling
- Electronical angle-of-rotation sensor, Type series PL1100, see data sheet D6-020
- Connection to zone 0 with thermowells (upon request)

Application

These thermometers are suitable for use outdoors and in aggressive environments. The devices can also be supplied with additional liquid damping for use in extreme conditions. Suitable thermowells see product group T5.

Window:	Non-splintering laminated glass. Option: non-splintering plastic (Macrolon) with adjustable reference pointer
Movement:	Stainless steel with compensation
Scale:	Pure aluminium, white with black inscription. Alternatively with marking or fixed reference pointer.
Pointer:	Pure aluminium, black with micro adjustment for zero point correction

Weights:

Bottom or centre back connection

NS 100:	
without filling:	approx. 0.6 kg
with filling:	approx. 0.8 kg
NS 160:	
without filling:	approx. 1.1 kg
with filling:	approx. 1.9 kg

Adjustable angel stem

Without screwing and temperature detecting element

NS 100:	
without filling:	approx. 1.0 kg
with filling:	approx. 1.2 kg
NS 160:	
without filling:	approx. 1.4 kg
with filling:	approx. 2.0 kg

Process connection

- Design:
- rigid temperature detecting element, bottom connection.
 - rigid temperature detecting element, centre back connection.
 - rigid temperature detecting element, adjustable angle stem, latching every 20°.

Various process connections can be supplied (see order details).

Measuring element

Measuring element: Bourdon tube, dead zone free with noble gas filling.

Temperature sensor

Temperature-detecting element: Diameter 6, 8 and ≥ 10 mm. Standard lengths and active lengths see order details, further sizes upon request
Material: stainless steel mat.-no. 1.4404 (316L)

Nominal range

Nominal range (EN 13190): -40...700 °C
Measuring spans ≥ 60 °C, see order details
Further nominal ranges from -200 °C up to 700 °C (no normal range) upon request.

Accuracy

Accuracy class: 1.0 per EN 13190

Temperature ranges

Ambient: Per EN 13190.
Ambient temperatures that deviate from EN are to be specified.

Storage and transport: -20...60 °C
Further temperature ranges upon request.

Tests and certificates

Explosion protection: Ex- protection (ATEX) for mechanical devices
⊗ II 2G c TX
⊗ II 2D c TX

Further details and temperature limits see Ex Instruction XA_005.

- EAC declaration (upon request)
- Certificate of measuring equipment for Russian Federation

Instructions for use

The loading capacity of the temperature detecting element depends on the following parameters:

- Media
- Media pressure
- Media temperature
- Flow velocity
- Insertion length
- Material

A technical examination might be necessary as well as the use of a separate thermowell (Product group D5).

Information on other models see order details or upon request.

Further information to mounting and operation see Operating Instruction BA_017.

Dimensions

Dimensions bottom and centre back connection

Temperature detecting element diameter d_5 , insertion length l_1 and active length l_2 see order details.

Dimensions (mm)														
					h^*	see order details					t^*	see order details		
case	d_1	b	a		D1001	D1107/1109/1122	D1207	D2007	D2009	D1001	D1107/1109/1122	D1207	D2007	D2009
NS 100	100	59	15		98	83	98	98	98	108	93	108	108	108
